## CHEAPER BY THE DROP!

### CHEAPER BY THE DROP: COOLUBE 2210's

COST EFFECTIVENESS IS OFTEN OVERLOOKED WHEN THE PRICE PER GALLON IS FIRST REALIZED. WHEN COMPARED TO MORE CONVENTIONAL MESSY FLOOD AND MIST TYPE COOLANTS OR LUBRICANTS, COOLUBE 2210'S PRICE PER GALLON MAY SEEM EXPENSIVE, BUT THIS IS NOT REALLY THE CASE.

### TYPICAL USAGE FOR LIGHT TO MEDIUM MACHINING OPERATIONS:

1 DROP EVERY 10 SECONDS\*  
= 360 DROPS PER HOUR  
= 3.25 OUNCES ( 12 CUBIC CENTIMETERS OR ABOUT .0245 GALLONS ) USED IN AN EIGHT HOUR CONTINUOUS OPERATION.

AT THE CURRENT PRICE FOR A 55 GALLON DRUM OF COOLUBE 2210, THIS WORKS OUT TO A COST OF **\$1.52 PER 8 HOUR SHIFT, OR 19 CENTS PER HOUR.**

### TYPICAL USAGE FOR HEAVY MACHINING OPERATIONS:

1 DROP EVERY 6 TO 8 SECONDS\*  
= 450 TO 600 DROPS PER HOUR  
= 4.06 TO 5.41 OUNCES ( 15 TO 20 CUBIC CENTIMETERS ) USED IN AN EIGHT HOUR CONTINUOUS OPERATION. THIS WORKS OUT TO **\$1.90 PER 8 HOUR SHIFT, OR 23 TO 32 CENTS PER HOUR.**

MAX SAYS ...UNI-MAX FLUID DISPENSERS WORK BEST WITH "COOLUBE 2210" AND WITH A COST AS LOW AS JUST 19 CENTS PER HR. YOU'LL MAX OUT IN..

- ...LUBRICATION COST SAVINGS!
- ...TOOL REPLACEMENT SAVING COST!
- ...MACHINE & PART CLEAN-UP COST!
- ...SCRAP RECYCLING SAVINGS!

- COOLUBE 2210 - "IF YOU CAN SEE IT YOU'RE USING TOO MUCH"
- COOLUBE 2210 - "THE MOST INEXPENSIVE MATERIAL AVAILABLE TO LUBRICATE METALWORKING OPERATIONS"
- COOLUBE 2210 - "PRODUCES DRY CHIPS AND LITTLE OR NO PART CLEAN-UP"

### BE STINGY:

Coolube 2210 IS A POLAR LUBRICANT AND MUST BE USED VERY SPARINGLY FOR FULL LUBRICATING EFFECTIVENESS. If it is used correctly and the proper amounts are dispensed, Coolube 2210 can be the most inexpensive material available to lubricate metalworking operations. ADDITIONAL COST SAVINGS WILL BE REALIZED THROUGH LONGER TOOL LIFE AND LOWER SHOP MAINTENANCE COSTS.

Coolube 2210 WHEN USED PROPERLY PRODUCES DRY CHIPS, REQUIRES MINIMAL MACHINE CLEAN-UP WITH LITTLE OR NO PART CLEANUP.

Coolube 2210 IS COMPATIBLE WITH ALL KNOWN METALS, PLASTICS, COMPOSITES AND WOOD. THIS ELIMINATES THE POSSIBILITY OF CHEMICAL ATTACK TO ANY BASE METAL OR MATERIAL.

\* THE APPLICATIONS DISCUSSED ARE BASED ON THE STANDARD DROP MEASUREMENT OF UNIST DISPENSERS (1 DROP = 1/30TH CUBIC CENTIMETER) AND SHOULD BE CONSIDERED AN APPROXIMATION. THE AMOUNT OF LUBRICANT NECESSARY FOR EACH APPLICATION WILL VARY WITH MATERIALS, SPEED AND FEED RATES. THE AMOUNTS DESCRIBED ABOVE ARE GENERAL STARTING POINTS. YOUR PARTICULAR APPLICATION MAY REQUIRE THE USE OF MORE OR LESS Coolube 2210 THAN DESCRIBED HERE.

## SAVE 10% ON YOUR 1st ORDER OF COOLUBE 2210

To order Coolube 2210 for your new UNIST system Fax this coupon or call toll free 1-800-253-5462
