

## WRITING THE BOOK ON NON-FRICTION™

**Company:** Norfolk Iron & Metal  
Norfolk, NE

**Summary:** UNIST equipped Norfolk Iron & Metal six saws (three Marvel 81, two HEM and one B125) with our 200-35-110 uni-MAX® Saw Blade Lubrication Systems. Our client, Mike Nolle, learned of UNIST on the Internet and took advantage of our FREE 30-day trial. The results were excellent and he equipped all of his saws with UNIST units.

His comments were “I don’t break blades like I used to. I can clean up with a shop vac. My customers get cleaner parts. They can weld through the ends without cleaning the parts. I don’t have rust problems with UNIST.”

He also used our High Pressure Coolube™ (2210EP) and likes it.
